

Créer une API Dropbox pour Moodle

Gilles LePage – mars 2015

1. Se connecter à son compte Dropbox

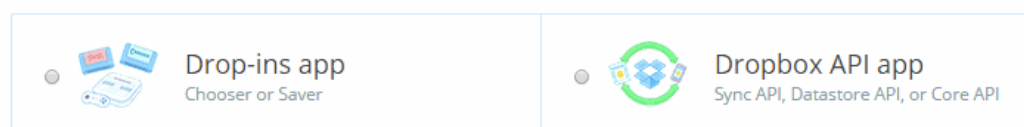

2. aller à <https://www.dropbox.com/developers/apps>

3. Cliquer sur Create App

Create a new Dropbox Platform app

What type of app do you want to create?

To create a Dropbox for Business app, visit [the Dropbox for Business app creation page](#).

4. Sélectionner les éléments comme ci-dessous

Create a new Dropbox Platform app

What type of app do you want to create?

☐ Drop-ins app
Chooser or Saver

☒ Dropbox API app
Sync API, Datastore API, or Core API

To create a Dropbox for Business app, visit the [Dropbox for Business app creation page](#).

What type of data does your app need to store on Dropbox?

☒ Files and datastores

☐ Datastores only

Can your app be limited to its own folder?

☐ Yes — My app only needs access to files it creates.

☒ No — My app needs access to files already on Dropbox.

Can your app be limited to its own folder?

☐ Yes — My app only needs access to files it creates.

☒ No — My app needs access to files already on Dropbox.

What type of files does your app need access to?

☐ Specific file types — My app only needs access to certain file types, like text or photos.

☒ All file types — My app needs access to a user's full Dropbox. Only supported via the [Core API](#).

Provide an app name, and you're on your way.

5. Saisir un nom pour l'App

Provide an app name, and you're on your way.

Create app

6. valider en cliquant sur Create app

Provide an app name, and you're on your way.

Create app
